

HometownRx Formulary - January 2022

This formulary is intended to assist you to better understand your pharmacy coverage.

Knowing your pharmacy benefit and effective use of the formulary (drug list) will help you be engaged in your treatment options and health. This document will help you get the answers to these questions:

- What medications are covered?
- What are my lower cost medication options?
- How is this formulary developed to ensure I have the best products?
- What can I do if the medication I need is not covered?
- Why do I need to obtain an approval (prior authorization) to get what my provider ordered?

What is a Formulary?

The formulary is a list of preferred brand and generic drug products for HometownRx members. The drug list includes drugs used to treat common diseases or health problems. A team of doctors and pharmacists (Pharmacy and Therapeutics (P&T) Committee) meet to decide which drugs should be on the drug list. The P&T Committee reviews new and existing drugs and chooses drugs that work best and are proven to be safe. Consequently, the formulary is updated regularly and subject to change without notice. The formulary is a good source for you and your provider to determine the best drug for your condition, at the lowest out-of-pocket expense to you. Ultimately, specific drug product selection for an individual member is dependent on your prescriber.

How to Search For Drugs

This document provides an alphabetical listing of medications covered on the HometownRx formulary. Inclusion on this list does not guarantee coverage and individual plans may vary. Agents listed are primarily oral, self-injected, inhaled or topical pharmaceutical formulations. Drugs requiring provider administration are generally covered under the medical benefit and may not appear on this list.

PLEASE NOTE:

- Certain specialty medications may only be available through your plan's preferred specialty pharmacy.
- Some medications may be subject to the Affordable Care Act (ACA) provisions or your plan's preventive benefit and covered by your plan at 100%.

- Individual plans may vary.
- For questions regarding plan-specific restrictions, coverage criteria, and cost sharing information, please log into your member portal and use the “What’s my Cost” feature or call the phone number printed on your member ID card.

Each medication may have specific coverage requirements not reflected in this document. The key below explains common coverage indicators present on this file. Drugs shown in lower-case are generically available and typically covered at the lowest member cost share.

- T1** Tier 1 medication, typically generics or drugs available at lowest member cost share.
- T2** Tier 2 medication, typically preferred or formulary brand drugs.
- T3** Tier 3 medication, typically non-preferred or non-formulary drugs.
- T4** Tier 4 medication, typically specialty medications.
- PA** Drug requires prior authorization to confirm medical necessity prior to coverage.
- QL** Quantity limits may apply.
- BP** Brand Penalty: Member may be responsible for the cost difference between brand and generic
- SP** Specialty Medication: This drug may only be available at the plan's preferred specialty pharmacy.

Benefit Coverage and Limitations

Certain drug products have been excluded from this formulary. If you choose to use an excluded drug product HometownRx may not reimburse for these drug products and may require you to pay 100% of the cost. Furthermore, if you choose to use a drug that is not on formulary or excluded, the cost, does not accumulate towards meeting your annual deductible or out-of-pocket maximums.

Certain classes of medication are not covered under your pharmacy benefit. These medication classes may include but are not limited to: non-FDA approved drugs, over the counter (OTC) medications, drugs to treat impotency or sexual disorders, fertility agents, weight loss drugs, hematinics, reusable needles, disposable syringes, ostomy supplies, infant formulas, dietary supplements, hypopigmentation agents, diagnostic agents, cosmetic medications, and compounded medications.

An ancillary charge (as know as a Brand Penalty [BP]) may apply to brand medications when an equivalent generic is available. If a member or provider chooses a brand medication over the generic medication, the member may be responsible for their copay/coinsurance plus the cost difference between the brand medication and the generic medication (ancillary charge). Ancillary charges do not accumulate towards meeting your annual deductible or out-of-pocket maximums.

The formulary applies only to outpatient drugs provided to members, and does not apply to medications used in inpatient settings.

What if my drug is not listed on the formulary?

To avoid delays in access to your treatment, your provider may check the formulary to prescribe a covered drug that is best for you. The HometownRx formulary offers a wide coverage of available drugs. However, in instances where the drug is rejected due to “Drug Not Covered”, you may either:

- Ask your pharmacy to contact your provider to change the prescription to a covered formulary alternative.
- If your provider believes the non-covered product is “medically necessary” for your condition, your provider may request an “Exception” for coverage. See the next section for information on how to request an exception.

How do I request an exception?

Members or providers can ask HometownRx to make an exception to our coverage rules. Exceptions are reviewed for medical necessity, your inability to use covered drugs (e.g., side effects, contraindications, allergies), current covered products may not be effective for you, and new drug entrants that have not yet been reviewed and placed on the formulary. Reviews will consider superiority of the request over current covered options.

Exception requests can be submitted by making the request to HometownRx:

- You or your provider can call us at 1-844-373-0970, or submit a written request for prior authorization review via fax at 1-866-521-9916.

Why do some drugs require prior authorization?

Drug coverage review is used to encourage appropriate and cost-effective use of prescription drugs by allowing coverage only when certain conditions are met. Some reasons for pre-authorization may include:

- Compliance with dosing guidelines
- Avoid duplicate therapies
- Help health care providers check medically accepted criteria that helps ensure high efficacy and low side effects

HometownRx implements prior authorization criteria based on the Food and Drug Administration (FDA) approved labelling, evidence-based national best-practice guidelines, and peer-reviewed journals.

What can I expect to pay?

What you expect to pay depends on the type of drugs your provider ordered for you. Each drug is placed in a tier level; different tiers represent the different levels of payment for covered medications. Tier structures are developed to encourage you to use quality products at the most cost-effective option to you. The lower cost option does not represent a lower quality product. Rather it is the best cost option considering covered products within that treatment category. You can be assured that drugs provided through your pharmacy benefit has been through rigorous processes to be approved by the FDA.

How can I save on prescriptions?

Here are some other tips to pay less out of pocket for your prescription drugs:

- Ask your provider to consider prescribing generic drugs instead of brand-name drugs, and whether the generic drug is right for you.
- Ask your provider to consider prescribing drugs that are on the HometownRx Formulary.
- Check to see if your plan includes our mail-order pharmacy service. Depending upon your plan, mail order may save you money.

What if I have additional questions?
