

AN OPEN LETTER TO NORTHERN NEVADANS REGARDING THE **CURRENT STATE OF HEALTH INSURANCE**

There has been a lot of talk coming out of Washington regarding health care over the past six months. Just last week, the President signed the Presidential Executive Order Promoting Healthcare Choice and Competition and this week the Senate addressed the issue.

We at Hometown Health, part of the not-for-profit Renown Health system based here in Nevada for nearly 30 years, are committed to keeping you informed of how policy changes such as this may affect your health care.

Despite recent events, the Affordable Care Act is still in effect and the Presidential Executive Order and the Senate negotiations do nothing to change that. What the Executive Order does is direct the various Federal agencies to make changes to regulations within the confines of the law. For Nevadans, at least for the foreseeable future, these changes will have no effect.

Hometown Health believes everyone should have access to health care coverage. Whether you receive health insurance benefits through your employer or purchase coverage through the Nevada Health Link, health insurance coverage protects you and your family from catastrophic medical events and allows you to get the health care you need. If you have questions regarding what health insurance plan might be best for you, please talk to a licensed health insurance broker. Their experience and knowledge of the various insurers and coverage options will allow you to select an appropriate plan.

To learn more about the Presidential Executive Order and what it means to you, please visit HometownHealth.com/HealthcareChoice2018.

To your health,

Ty Windfeldt, Chief Executive Officer
Hometown Health
